

GameWorld- An online game store

Website Name: GameWorld

Topic Description: GameWorld is an online video game retail shop modeled after physical stores like GameStop, but reengineered to offer a modern and convenient online shopping experience. The site will feature a large inventory of video games across several platforms, including PlayStation, Xbox, Nintendo, and PC. The website will allow consumers to browse through the games, read extended descriptions, view trailers, and check availability before making a purchase. Apart from games, the store will also have consoles, gaming peripherals, and collectibles, hence a one-stop shop for all gaming needs. Overall, the objective of GameWorld is to provide an easy-to-use, interactive interface that enables game and gaming merchandise shopping to be easy, fast, and enjoyable.

Planned Pages (may remove or add some):

1. Home Page
2. Games Catalog
3. Consoles and Accessories
4. Collectibles and Merch
5. About Us
6. Contact Page
7. Shopping Cart
8. Checkout Page
9. User Account Page
10. Admin Dashboard

Data Storage, Manipulation, and Viewing: Data about video games, consoles, accessories, and collectibles will be maintained on the website. Product information will include price, description, name, category, and quantity in stock. Customer information will also be kept which includes fundamental information such as username, password, and order history. Users will be able to view and purchase items, whereas administrators will be able to add, modify, or remove products from stock. This guarantees that consumers view current data while administrators can facilitate the store offerings.
